

# SNAPEEZ®

Just think...no more soldering of jump rings!

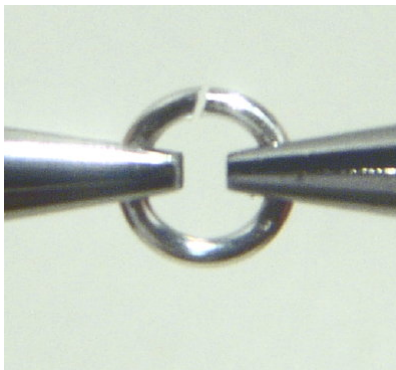

No more using those unsightly split rings to attach your charms!

Link your wire wrapping with Snapeez® for supple movement!

BRUSH, SNAP and WIGGLE and the Snapeez® are securely closed!

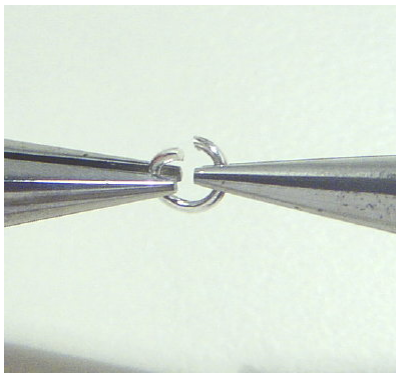

## SNAPEEZ® "The Snapping Jump Ring"

**Step 1)** Place your chain nose pliers on the Snapeez® with a good grip on either side of the ring about half way down on either side. The natural opening to the Snapeez® will be evident at the top.

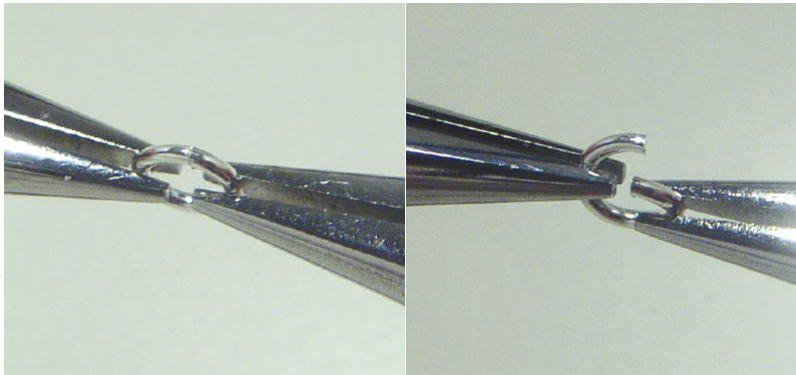

**Step 2)** Tighten up your dominant arm and let your other arm hold the Snapeez® in place.

**Step 3)** Keep a good grip on the Snapeez®. Hold your hands parallel. Don't move them up and down. While holding your non-dominant hand steady, open the Snapeez® by pushing the natural opening side of the ring away from your body with your dominant hand.

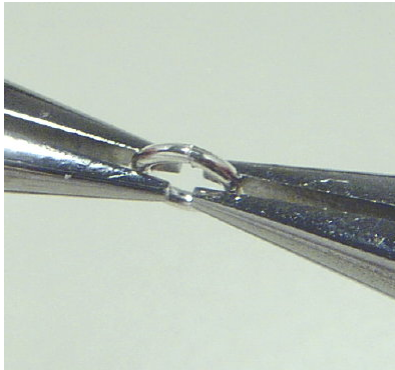

**Step 4)** With your dominant arm still tight and your other hand steady, pull the Snapeez® back towards your body and pass the opening of the Snapeez® a little

bit. The sides of the opening of the Snapeez® should **BRUSH** against each other.

**Step 5)** Then push the Snapeez® back toward the opening and **BRUSH** the sides of the opening together with your dominant hand and you should hear a **SNAP!** Remember...**BRUSH...SNAP...**

**Step 6)** Look directly at the spot where you did the **BRUSH** and **SNAP**. Now **WIGGLE** the Snapeez®™ back and forth at this spot a little bit to get a nice alignment to your closure. Remember...**BRUSH...SNAP...and WIGGLE!**
