

Create-Your-Style™ / Beading Techniques

Learning Objectives: This hands-on seminar explores many techniques used in the area of beading and manipulative jewelry making. All participants will receive important information on getting started, various supplies and tools needed, as well as a variety of finishing techniques and stimulating designs and sketches to inspire even the most experienced jewelry designer.

Class size: 25 participants

Class duration: 3 ½ hours

Learning Concepts: At the completion of the seminar, participants will know:

- Various techniques using head pins and memory wire
- Techniques using plain craft wire to create jewelry using Swarovski Chatons
- The concept of loom weaving to make beaded jewelry and accessories
- How to work with various threads to weave beads

Benefits of Participation:

- Learn tips and tricks for easier manipulation of elements when making jewelry.
- Learn why using Swarovski products will lead to a higher quality end product.
- Gain inspiration ideas from top designers.

Who Should Attend:

This hands-on seminar is for jewelry designers, design students, instructors & manufacturers interested in learning new ways to create high quality, innovative fashion products.
